

EMBROIDERY NOTEPAD

Cutting Instructions

There are small, thick guide marks at each of the four corners for cutting. Each of the guide lines is the same color as the grid, just slightly thicker. The margin is 1/2" on all four sides. The center of the notepad sheets is 7.5" x 10".

I suggest picking a side and cutting along those guide lines and then cutting along the top and bottom, leaving one side uncut. Then, cut the sheet in half along the final guide line along the side you didn't cut away. After the sheet is cut in half you can cut each "note" sheet at 2.5" wide, removing the remaining side as you cut the note sheets.

Each sheet of the notepad measures 2.5" wide x 5" tall.

If you choose to glue your pages together to form a notepad I suggest finding a book binding medium. While Mod Podge does work, I find the pages tear away very easily, where as book binding medium is a bit thicker and has more hold. You can find links to everything I like to use to make notepads on my Recommended page on my website.
